Mandy is new to the world of bdsm, but today she gets a taste of the most extreme restraints on earth. First she's locked into a device that restrains her head and wrists. Her clothes come off, and her hot body is exposed. The torment comes on slow; we want to work her up to what is expected of our girls. The next layer is sensory deprivation, then sensory overload. Her pussy and ass are penetrated, and she gets to experience her most powerful orgasm ever. On her back, strapped down with her legs spread wide, she gets a taste of electrical shock. She is now getting the full Device Bondage experience in all of its twisted glory.
