I'm making my way across the country and world, having been invited to work at the most famous dungeons in business now as research before I open the doors to my own dungeon in San Francisco, MM . My first stop was the notorious Midtown Manhattan dungeon to film two days with one lucky client. I tore this man in two and drained him of every drop of man filth that he had inside him whether he wanted it himself or not and this was only day one. This update has everything you ever wanted in a femdom movie, humiliation, milking and draining, pain and punishment, CBT, ass worship, pussy worship and so much more!
