Take a slut who says she is tough and loves to cum, then add a device that puts all of her weight resting on her pussy, and you get our first scene. Her clothes are ripped from her body and painful flogging reddens her tone body. Screams fill the room as the sadistic torture continues, all the while her pussy constantly feels the pressure of her body pushing down. She is made to cum while enduring the agony of her sore pussy. Next she is put into a grueling hogtie and her nipples are tormented. She gets overwhelmed when the fucking machine is sped up to a cunt numbing speed. Her soles are so exposed and begging to be destroyed, so we oblige with caning and rubber bands. The day is finished with her strapped down to the back breaker and continued beatings. She is then made to come so hard that she squirts nine feet. Still not satisfied with her, I shove the magic wand inside of her cunt and tease and deny her of any orgasm until she is ready to explode. The last orgasm shoots the vibe right out of her sopping cunt.
