Nerine is clearly not new to kinky sex so here on Device Bondage we must give this pain-slut a proper challenge. Position 1 has her on her knees with neck restraints. Her ample breasts are highlighted with bondage and nipple suction. It takes a cock in her throat and a single-tail on her backside to make this bitch cum! In Position 2 she is suspended high up in metal and leather straps with her ass and pussy conveniently exposed with spread legs. She gets vicious clover clamps on her pussy lips but this does not prevent her from begging to cum with the dick-on-a-stick pounding her. Position 3 is a simple back arch with creative nipple clamps stretching her breasts taut. She has a great caning session to top it all off!
