Kat is new to the scene and we finally get her on our pages. She is young, eager to please, and she loves to suffer. She is first put in a doggy position with belts and chains. Tens pads are placed on her ass and the torment begins. She is then fucked and an ass hook is added to keep the slut in the proper mind set. Next she is spread out and exposed for Orlando to torment her little body even more. She is caned all over and made to cum over and over until her pussy has no more to give. In the final scene, her body is covered with pegs, then wrapped tightly in plastic wrap. Her pussy is the target and this time it is destroyed.
