We begin with Roxanne balancing on her knees with her arms stretched out. Her clothes are ripped away and her body is abused. Pegs are added to her nipples then flogged off. Next she is in a doggie style suspension. Again this little whore is terrorized before being fucked and made to cum. In the final position we have her in a spread eagle on the floor and we find out that she is terrified of being blindfolded. I see a weakness and I jump right in to mindfuck this little slut as hard as I can. She begs and pleads to stop, but her pussy gets wetter with every passing second of her begging.
