Elise is mounted on a sybian. All of her weight is resting on her cunt and her arms are sleeved and pulled into a strappado. The zipper is applied to her body, starting at her ear lobes and continuing all the way to her ankles. The zipper is ripped from her flesh and the room fills with screams of agony. We turn the sybian up to full speed, sit back and watch as she slowly starts to give out. Then, she is folded in half to expose her bottom two whore holes. She is pinned against the wall but refuses to give up and suffers through intense bastinado and a severe ass beating. Her reward for the day is having both of her holes filled and mind blowing orgasms.
