As the interview is coming to an end, I notice this smirk on Gabby's face and I can't help to think that she's not taking this as serious as she should be. I slap her across her smiling face, snatch her up by her throat, rip her clothes away, and show her that I will not tolerate her shit. We put her in a straitjacket, tether her to our rig and rip multiple orgasms out of her. Next she's locked into a floating spread eagle, a zipper is applied and her feet get the full treatment. She is allowed to cum, but then there's that zipper that we still have to rip from her body. Finally her ass is fucked and she is made to cum more than she can handle.
