We begin with Elizabeth chained and hiding in a corner. She attempts to scurry away when her captor arrives with no success. She is quickly disciplined for being a bad pet. She's flogged, beaten, manhandled and made to cum against her will. Next Elizabeth is abused and tormented while hanging helplessly in the air. She is subjected to breath control that sends her into a panic as she fights to breathe. In the final scene she is on her back with one leg pulled up and the rest of her body chained to the wooden box. She is fucked mercilessly with her screaming to make it stop, but we don't. She orgasms so much that she loses control.
