I have built a bit of a rapport with this little bratty slut. She likes to see what buttons she can push and how long I will allow it until I spank her little ass. I'm ok with that because she is willing to take the punishment for her bratty actions. Once in the bondage her pussy begins to drip with anticipation of the pain and suffering that is coming. The helplessness and thought of being tormented by the most sadistic mother fucker keeps this pain slut wanting more and coming back for it.
