Eager to please and hungry for new experiences, Gina Valentina jumped at the opportunity to put her perfect little body on display and get punished for the whole world to see. The Pope didn't waste any time and quickly restrained her tanned 19 year old body in a cruel implement of classical metal bondage called the Scavengers Daughter. It breaks the will of even the most stubborn and headstrong of captives by hunching them forward and locking their legs wide open. The effort needed to be in this particular bondage quickly wears Gina a down, and the sweat and drool glistens on her skin as The Pope begins to tenderize her body.
