Dahlia is in a variation of the scavenger's daughter, sitting on the ground. She is fondled and penetrated, tormented, then the device is pulled into the air. She is then put in a inverted ankle suspension with her arms and head held in place with stocks. A deprivation box is mounted to the stocks for her pretty little head to go in. She is covered in pegs, caned, flogged, and made to cum before she is let down and put into her final device. Next she is put in a brutal back bending device that shows her no mercy at all. Her body is then covered in hot wax and her nipples are tormented with a cane. Her final orgasms are monumental!
